

5 TIPS FOR A GREAT FIRST LOOK

EASY STEPS FROM THE EXPERTS

trust your Photographer/Vidographer

We've been through lots of first looks and seen just about anything and everything. Really, we just want to capture you experiencing each other for the first time. Whether it's before the bridal session or before the wedding ceremony. If there is something specific you want, let us know and trust to us capture it. We usually capture everything from multiple angles.

We've got you covered!

Read Vows/Love Notes

This is the best way to help create emotion so that you both can be right there in the moment. You can be back to back and read them to each other or read them silently. Not everyone wants to read their vows before hand and that's totally okay. You can write a love note to your soon to be spouse and read that too. It's the best way to make sure you are both in the head space to let us create some magic for you.

Enjoy and get caught up in the moment

Get caught up in the moment. Even if we're there capturing it all. Don't let that stop you from being passionate, crying, whatever comes out, just be there fully with each other. Don't worry about the nerves. Nerves are a good thing. Of course your nervous & excited to see them for the first time!

Have one with Family/Friends

This is one that we love! If your mother/father haven't seen you in your dress/suit yet, have one with them too! Let them see you and let us capture it. We love it when the wedding party (bridesmaids, groomsmen) get to see you both for the first time too! It's just another way to capture fun moment throughout the day.

Don't Overthink It

First looks always seem like they are built up to be a huge deal. Don't over think it, you don't need to have a big reveal at all. Just know that it's another fun and exciting thing to capture and remember. As long as you're together and are able to be in the moment seeing each other for the first time (down the aisle or at a first look), know that we will be able to help capture it for you.
